

Orientation of ATOM

2022

A.T.O.M. Robotics society hosted their orientation session on 16 November 2022 at 1 pm in the mini auditorium. The orientation session was attended by over 250 students. The orientation session covered various topics from introduction to the field of robotics and the scope of robotics as a career to history of the society. It also had a basic introduction to industrial robotics and to the Robot Operating System (ROS). Society members introduced and demonstrated various projects of the society and gave a brief overview of making projects in the society. The session also focused on the competitions that the members of the society have won along with how can students join the A.T.O.M. Robotics society. Society members answered various doubts that students had in their mind regarding the society and the field of robotics. The session was completed with a fun and exciting quiz conducted by the society where students were giving exciting prizes for giving correct answers to the questions.
