

## ***Linux Installation fest (21 November 2022)***

A.T.O.M. Robotics Society hosted a Linux installation fest and an introduction to Linux session on 21 November at 1 pm in the mini auditorium. The Session covered various topics like advantage of using Linux, why is it popular, potential use cases of Linux, and Linux community. It also included basic architecture of Linux and how to use the Linux command line. It also included how one can customize their Linux installation. The event was attended by over 100 students from all branches. Society members helped students in installing and configuring Linux on their respective laptops. The event proved to be an eyeopener to Linux for the students.
