

Tech Showcase

ATOM Robotic society organized a tech showcase at the stands at 12 Noon on 14 November to showcase their past projects and have interaction with students. All the members of the society showcased and demonstrated some of the projects that have been made by the society members. They interacted with students about the society. Students learnt about how society members work on various projects and the competitions they have won using those projects. Students interacted about robotics and the scope it has as a career. They also learnt about how robotics is used in the industry. The event was an insightful and learning experience both for students who visited the showcase as well as for the society members.
